Van Khanh Luong

Project Idea - Exam Score Prediction

Dataset

- [Exam Score Prediction Dataset](#)
- ≈ 20.000 rows

Research Question

- "Can we predict exam scores based on a student's academic behavior, study habits, lifestyle routines, and exam conditions?"

Features

- age, gender, course of study
- daily study hours, class attendance, study method, sleep duration, sleep quality
- internet availability, facility rating
- exam difficulty, exam score

Target Variable

- exam score percentage (1-100)
